

# DUSTSAM

**DUSTSAM**<sup>®</sup> uses special instruments to detect contaminants such as **PARTICULATES, ENDOTOXINS, MOLD, METALS AND FIBERS** in the air. The significance of **DUSTSAM**<sup>®</sup> measures the concentration of physical particles in the air. These substances can cause respiratory impairments if **EXCESSIVELY** inhaled. So **DUSTSAM**<sup>®</sup> helps people, employees, and companies measure air quality and determine what safety precautions they need to take.
