

GASSAM

GASSAM[®] uses special instruments to detect contaminants such as **CARBON DIOXIDE, CARBON MONOXIDE, OZONE, FORMALDEHYDE, FOSSIL FUEL OFF-GASES (NO², SO²) AND OTHERS** in the air. The significance of **GASSAM[®]** is that these substances can cause respiratory impairments if **EXCESSIVELY** inhaled. So **GASSAM[®]** helps people, employees, and companies measure air quality and determine what safety precautions they need to take.
